**Privacy, Ad fraud, And The Problem
With Facebook And Google's Single Sign On Services**

Digital advertising is totally dominated by Google and Facebook

In 2018, Google and Facebook took in 65% of the \$60 billion generated by digital advertising.

Platform advantages

SCALE. Publishers are siloed and easy to pick off, one by one.

FREE REIGN. Platforms are everywhere with no accountability. They have facilitated rampant ad fraud.

FOCUS. Platforms are designed to sell advertising and buy your attention, and they don't care how they get it.

Publisher advantages

The background is a solid teal color. It features several decorative elements: a large, semi-transparent pie chart in the upper right quadrant; several smaller, semi-transparent pie charts scattered throughout the right side; and a semi-transparent bar chart at the bottom right corner with five vertical bars of varying heights.

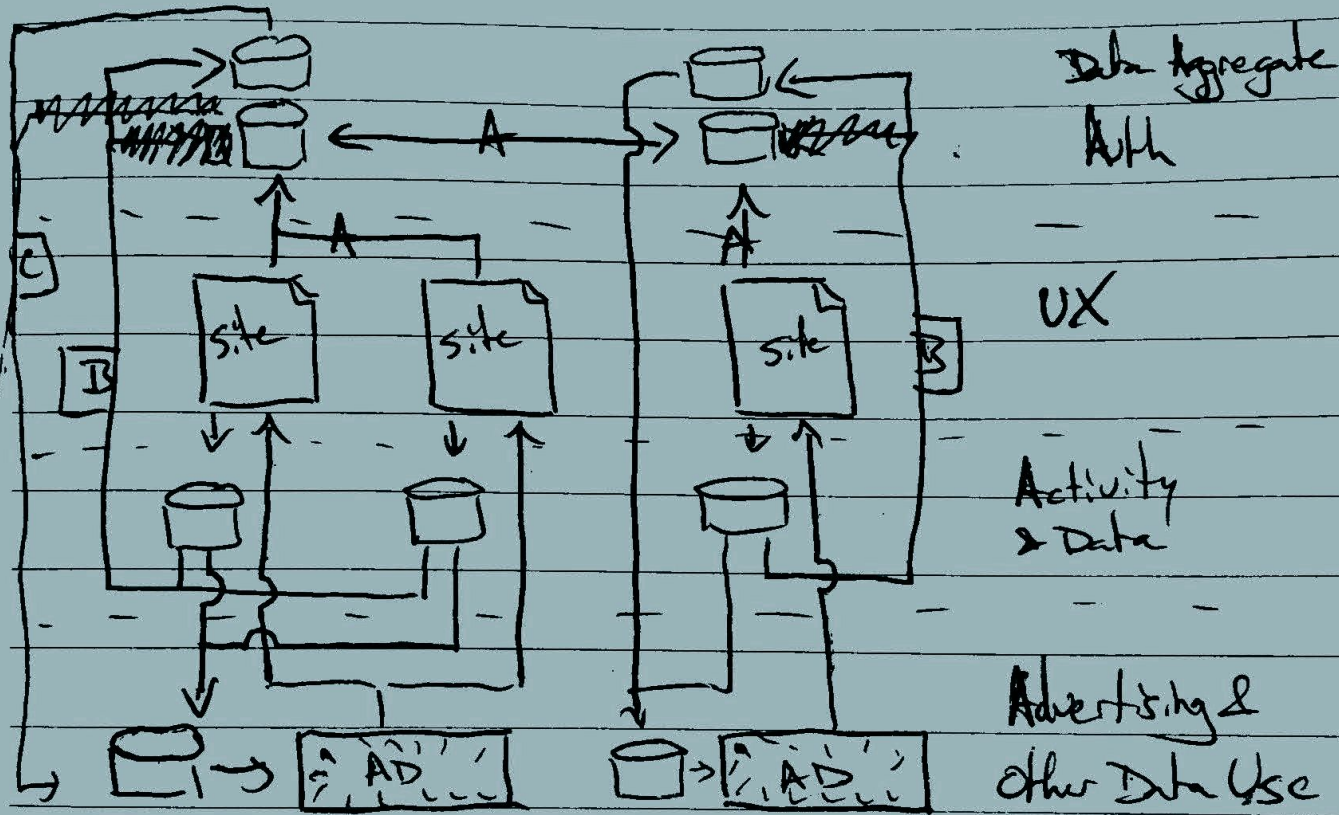

VALUE. Ad fraud steals \$7 billion a year from advertisers.

TRUST. Publishers have trusted relationships with real people and their communities.

QUALITY. Publishers can deliver quality and engaging content without resorting to violating privacy.

The background is a solid teal color. It features several faint, semi-transparent graphics: a large pie chart in the upper right, a smaller pie chart below it, a bar chart in the bottom right corner with four bars of increasing height, and several other smaller pie charts scattered throughout. The text is centered on the left side of the image.
